Unofficial meeting notes

These are based on the meeting notes of Gerard Bricogne. They are presented here in the absence of more detailed or authoritative minutes.

Steering committee

- The STC should be more active in contributing to shaping the meeting programme.
  - Possibly a web meeting two months before the next meeting?
- The collaboration can continue to be restricted to the data model and its API, with different servers for presentations to users.
- Approaching the EOSC (European Open Science Cloud).

Developers' meeting

- Autoprocessing results presentation not depending so much on XSCALE
- Serial crystallography needs new categories in the data model.
- Global Phasing will chair developers' web meetings for the upcoming year.
- More formalisation of the API
- Data re-processing after the first autoprocessing
- Discuss the definition / job description of an extra FTE that could be in charge of the common API development.
